

Certified Registered Safety Professional CRSP Endorsements

What are CRSP Endorsements?

- CRSP Endorsements are safety certifications for specialty or specific areas of safety emphasis.
- As you journey through your safety career, the ISSP provides the ability to add specialty Endorsements to your CRSP Certification.
- There are two categories of Endorsements - Technical and Industry:
 - Technical Endorsements: Emergency Response Planning - Human Factors & Error Prevention - Safety Automation – Accident & Incident Investigation - Change Management - Permit Required Confined Space Entry - OSHA 300 Log - Machine Guarding, and more.
 - Industry Endorsements: Healthcare Safety - Aviation Safety - Chemical Safety - Oil & Gas Safety, and more.
- The ISSP will add additional Endorsements as our members request them.
- Adding CRSP Endorsements provides an opportunity for continued growth, professional development, and advanced credentialing throughout your safety career.

How can I obtain CRSP Endorsements?

- Obtaining an Endorsement is accomplished in three steps:
 1. Attend a course of instruction for that particular specialty area.
 2. Upload your training certificate and apply for the Endorsement on our web site.
 3. Take a 20 question exam designed specifically for that specialty area. Endorsement exams are offered at \$125.00 (US).
- When complete, the ISSP will display the Endorsement next to your name on our web site.

For additional information check the web site or e-mail us.
